EXPERIENCE

XDAIT. (MEXICO)   2025
PROJECT MANAGER
- Coordination of the development of the YDPAY platform from a technical and strategic perspective.
- Supervision of integration processes with financial and administrative systems.
- Management of a multidisciplinary team, focusing on functional and scalable deliverables.

DEDICA. (MEXICO)   2024/25
PROJECT MANAGER
- Gathering technical information to identify errors, propose improvements, and provide guidance on defining ideas.
- Evaluating and segmenting staff, with strategic role assignment.
- Managing teams using Scrum methodology, ensuring compliance with the collateral credit system's objectives.

SMART APPS. (GUATEMALA)   2024/25
PROJECT MANAGER
- Integration of the VisaNet payment service with the SmartApp administrative system using an Android application.
- Design of wireframes for product management within the APK.
- Selection and formation of the technical team through interviews and casting.
- Agile project management, with definition and monitoring of key tasks.

UNIVERSITY TOWER. (GUATEMALA)   2024/25
PROJECT MANAGER
- Information gathering and process analysis to define problems and propose technological solutions.
- Database design for internal messaging, fault reporting, and business management.
- Implementation of agile methodologies to coordinate tasks and optimize resources.

SATSTREET. (MEXICO)   2019/24
PROJECT MANAGER
- Defining strategic and technical objectives for the development of a cryptoasset exchange platform.
- Coordinating teams using the Scrum methodology, tracking tasks and resolving issues.
- Designing a database for managing wallets, transactions, and financial reports.
- Creating wireframes for web and mobile interfaces, optimizing the user experience.

SOY AGENCIA. (MEXICO)   2019
PROJECT MANAGER
- I assumed leadership of the project in an advanced but stalled phase, reactivating development until it was put into production.
- I coordinated the integration of administrative and financial processes, ensuring system operation.
- I oversaw final delivery, validating key features and ensuring product stability.
- I coordinated the team using the Scrum methodology, assigning tasks and ensuring deliverables.

THE FUTURE. (ENGLAND)   2017/18
PROJECT MANAGER
- I led the migration from an older platform to Laravel, ensuring compatibility, scalability, and performance improvements.
- I coordinated the technical and creative team, planning tasks using the Scrum methodology and overseeing deliverables in agile cycles.
- I designed and optimized the database to support features such as dynamic forms, graphical proposal management, and client tracking.

SFANET.NET. (VENEZUELA)   2017
TEAM LEADER FULL STACK/ CO-PROJECT MANAGER.
- I developed the complete administrative system, including modules for business management, inventory, activation, blocking, and recharging of GSM lines.
- I implemented B2B connections to enable the delivery of GSM internet and recharging from authorized points.
- I integrated financial and accounting reports, ensuring traceability, control, and operational efficiency.
